Pallet Despatch Checklist

Common requirements for all deliveries into Woolworths, Coles & Metcash DCs

1 — Check the Pallets

Ensure that the Chep or Loscam pallet:

▷ has all boards and bearers correctly in place

▷ has all boards flush, square and undamaged, within standard accepted tolerances

▷ is uncontaminated by dirt, chemicals or debris

Ensure that the stock is:

▷ properly centred on the pallet

▷ not overhanging the pallet edges

▷ Note: where slip-sheets or pallet-pads are used, these also must not overhang the pallet edges

Ensure that the pallet wrap is:

▷ firmly secured with sufficient passes to provide tension and maintain pallet stability

▷ bound to the top 30-50% of the wooden pallet to properly anchor the product

▷ neatly applied - with no 'tails' or 'dags' - to help ensure that wrap won't come loose in transit

2 — Check the Cartons

Ensure that there are:

▷ GTIN barcodes visible on fork-entry sides of pallets, for easy scanning by Receiving staff

▷ no damaged or crushed cartons

▷ no leaking or moisture-affected cartons

3 — Check the SSCC Labels

Ensure that valid SSCC pallet labels are applied:

▷ on each fork-entry side of the pallet

▷ indented 50-100mm from the right hand edge

▷ at between 400-800mm height from the ground

Ensure that both SSCC pallet labels:

▷ match each other exactly

▷ match the product exactly

▷ are clearly visible and not wrinkled or damaged
